Colola
Look Book

Take Your Sectional In A New Direction With Colola Beach.

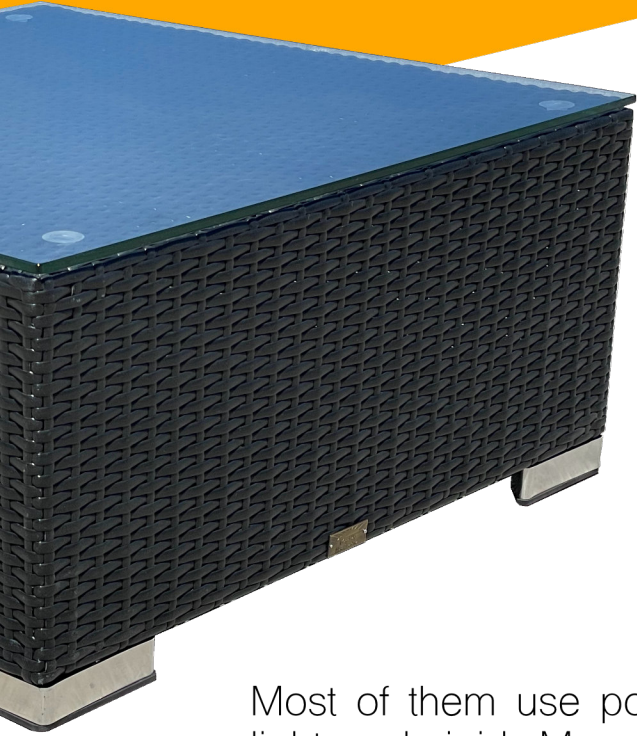

The UV-protected wicker sports a flat woven design, creating a contemporary look with clean lines. Each strand of this outdoor wicker is made from High-Density Polypropylene (HDPP) and is infused with its rich color and UV-inhibitors that prevent cracking, chipping, and fading ordinarily caused by sunlight. This outdoor wicker sectional piece, supported by a thick-gauged and powder-coated rust-resistant aluminum frame, makes it more durable than natural rattan. This sectional piece includes fade and mildew-resistant Sunbrella cushions filled with quick dry foam for added comfort in your outdoor space.

Visit us today at www.marcopolofurnishings.com for more information on these and other high quality furniture products.

Commercial Quality Furniture

Why buy commercial quality furniture from Marco Polo instead of from a big box store? The quality of our furniture over theirs is apparent right from the basic materials.

Most of them use polyethylene (HDPE) resin wicker which is light and rigid. Marco Polo only uses polypropylene (HDPP) resin wicker which is heavier and has greater elasticity. This allows for higher durability while still being comfortable in a wider range of weather conditions and temperatures.

Test it for yourself. Push your fist into the resin of one of their products and see that it doesn't come back right away. In high temperatures, it may not even come back at all.

In addition to being a much more functional material, our resin is noticeably more UV-resistance to fading in the sun. In commercial applications, it's important that you can use solvents and cleaners that could break down the other guy's products in a much shorter period.
